

Business Advisory. EU Funds. Project Directing.

## Capital Discount for the Energy Efficiency

**The objective of the support program is to promote investments in improving energy efficiency, smart energy management, and the use of renewable energy sources in industry and among economic operators.**

**March 11, 2025 – Cabinet Regulation No. 155 “Support Program Regulations for Business Greening, Use of Renewable Energy Sources, and Energy Efficiency Improvement.”**

**Support amount** – The program provides support of up to **30% of the total project loan** (from Altum or a commercial bank), but **no more than EUR 3,000,000**. Additionally, the program includes a loan of up to **EUR 10,000,000**.

**Type of support** – The type of support is a **capital discount**, i.e., to qualify for support, the company applies for an Altum loan, which is **partially cancelled upon successful project implementation**.

### Eligible actions

- g The reconstruction or renovation works that increase the energy efficiency of non-residential buildings and warehouses;
- g Implementation of energy efficiency improvements in non-residential buildings;
- g Increasing energy efficiency of existing equipment;
- g Purchase and installation of more energy-efficient production equipment;
- g Renovation of engineering systems;
- g Implementation of renewable energy sources and energy storage or accumulation systems;
- g Implementation of technologies to ensure non-polluting production processes.

### Main requirements

As a result of the project implementation, a primary energy savings of at least 20% must be ensured, or the final energy consumption must be replaced with renewable energy sources.

**Project submission** – Next round is planned in Summer, 2025.

**Project realisation** – until 31.03.2029.

**We invite you to apply for a free consultation to find out the possibilities to attract financing for your company.**
