

Business Advisory. EU Funds. Project Directing.

Support for the Development of New (Dual-Use) Products

The purpose of the measure is to ensure the availability of funding for companies developing new dual-use products and technologies in the field of defense and security.

It is recommended that projects are implemented in partnership between at least two companies, or between a company and a scientific institution. This provides additional support intensity.

Implementing authority: CFLA, www.cfla.gov.lv.

Support: grant of up to EUR 1,000,000, with funding intensity of approx. 60–80% of total costs.

Innovative product – a new or significantly improved product or technology at the level of the final recipient. Significant improvements include, for example, adding new functions, improving functional properties and applications, including increasing quality, financial accessibility, usability and convenience, more economical use, increased durability, and extending the product's lifespan.

Eligible Activities:

g Support for research and development (R&D):

- o Salaries (including payroll taxes),
- o Project management,
- o Materials,
- o Costs of tools, equipment, and apparatus for research purposes,
- o Rental of premises,
- o Intellectual property costs,
- o Outsourcing.

Project submission: planned for the end of 2024.

Project implementation: until June 31, 2029.

Key Criteria:

- g The applicant's average monthly gross salary for employees is not lower than the average monthly gross salary in the national economy in the previous year,
- g The company's turnover in the last closed financial year before the project application was submitted is at least twice as large as the planned public funding.

We invite you to apply for a free consultation to explore funding opportunities for your company.
